

Hi Samara ,

Hi samara , I am currently exploring the land of Easter Island. I have seen the most amazing Statues are the they ever amazing. I can't believe these statues still remain a mystery to archaeologist.

The statues on Easter Island are said to be Guarding burial platforms and are made of volcanic ash and rock. I wonder if they are guarding people who died from a volcanic eruption.

As you know I am very tall but you should see me against these statues. Some of them are over 13 meters tall. Can you believe it?

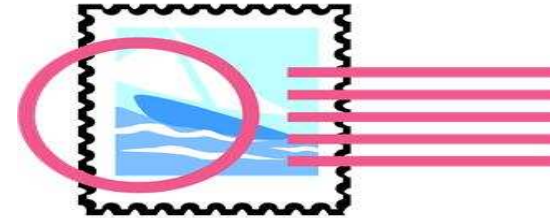

I was on a tour of the Island with my friend Marissa you know the girl from Pinawa and she said it puzzles her how these statues where carved over 2000 years ago and no one has uncovered there purpose.

Not only have they not uncovered there purpose but the writing on the tablets have not yet been translated. I wonder if we will ever know the truth about the creation of these very special statues?

Sincerely yours,

Olivia Thomas

P.S I will post pictures on your facebook
